FOR IMMEDIATE RELEASE

November 12, 2021

Immediate Action Needed to Stop the Surge of COVID-19 in Algoma Communities

Actions to Protect Yourself, Your Household, and Your Workplace:

- 1. Anyone who is sick, even with mild symptoms, must stay home and isolate away from others - regardless of whether you have received the COVID-19 vaccine.**
- 2. Cut back on unnecessary activities where you have unmasked, face-to-face close contact with people you don't live with. Do this even if you are fully immunized, and especially if you have vulnerable health conditions or are not fully immunized.**
- 3. Get your COVID-19 vaccine**

Increased Community Transmission of COVID-19 in Algoma

- . COVID-19 activity in Algoma is rising and is currently the highest that it has ever been since the beginning of the pandemic.**
